

Pro Display XDR Pro Stand – Technical Specifications

Languages English

Attach and detach

Effortlessly attaches and detaches for quick and easy transportation. The puck-shaped magnetic connector is designed to attach to the back of the display and locks the Pro Stand and the display together. To detach, simply unlock the slider and tilt the display far back to release the magnets, then lift the display off the Pro Stand.

- Height adjustment: the system allows for a total height adjustment of 120 mm (60 mm in each direction from the midpoint)
- Orientation: landscape or portrait
- Tilt: -5° to $+25^{\circ}$
